

Instructions for Home Learning

- Your teachers have planned Maths and English activities for you to do and these are the most important things for you to finish. Try and do these first.
- If you have some more time, it would be great if you could also do some reading.
- We will tell you which pieces of work we would like you to email back to us so that we can give you feedback on them. Your teachers always enjoy looking at your work so you can email in other things too, but they won't be marked.
- Every week we would like you to try and complete 2 lessons from the 'Wider Curriculum' section. For example, you could do a science lesson and an art lesson. There are lots of things to choose from and if you have time, you could do more.
- Try to choose different subjects each week so that you learn about a variety of things.
- Each week we will add new work. If you scroll to the bottom of the page, you will see that we have left up the lessons from last week. We know from your feedback, that some of you would like to finish everything before moving on to the next week's work, even if it takes you longer than a week to do so. This is fine. Just try to do as much of the work as you can.
- Remember that you don't need to print out your work. You can write your answers straight into your exercise book and, if your teacher has asked to see this work, you can take a photo of it and email it to school.

The most important thing is try your best and contact us if you don't know what to do. You can email your teacher if you get stuck and they can contact you and give you some help.

Stay healthy and safe and we look forward to seeing your work.
